

Family Search Batch Numbers

Below are batch numbers I have made note of in my research searching familysearch.org (lds site). I hope they help you as much as they have me in finding "elusive" marriages because of misspellings, etc.

To search by Batch# at familysearch.org, click on the "search" tab when the main page loads. Then click on "International Genealogical Index" (4th item down on left side of page). At this page you can enter as little or as much information as you have as long as you enter one of the batch numbers below and set the "region" to North America.

The items to the left below are the batch numbers separated by county with the years covered to the right. You will notice that some counties have overlapping records . . . and it is worth it to check EVERY occurrence of the year.

Good Luck!

Melissa
